EXPLANATION

NON-FEDERAL COAL LAND--Land for which the Federal Government does not own the coal rights.

LIMIT OF RESERVE BASE COAL--5 foot coal isopach or 1000 foot overburden line. Arrow points toward reserve base coal.

BOUNDARY LINES--Showing areas of measured, indicated, inferred, and hypothetical coal resources. Dashed where projected from adjacent quadrangles.

RB	R(85%)	R	(Measured resources)
4.8	4.1	36.0	(Indicated resources)
42.4	42.4	55.7	(Inferred resources)
65.5	65.5		(Hypothetical resources)
HYP 1.3	HYP 1.3		

IDENTIFIED AND HYPOTHETICAL RESOURCES--Showing totals for Reserve Base (RB) and, in areas suitable for surface mining, Reserves (R), in millions of short tons by section. Dash indicates no resources in that category. Reserve Base (RB) x Recovery Factor (85%) = Reserves (R).

Recovery factors have not been established for underground development of the coal in this quadrangle. Therefore, Reserves (R) were not calculated in areas where the overburden thickness exceeds 200 feet.

To convert feet to meters, multiply feet by 0.3048
To convert short tons to metric tons, multiply short tons by 0.9072.
